

Organic NPK

A biologically activated, fully composted organic fertiliser enhanced with premium ingredients like poultry manure, seaweed, bone meal, and zeolite. It delivers 4 forms of nitrogen, phosphorus, and calcium, 3 forms of potassium, and 2 forms of sulphur and silicon. This nutrient diversity promotes sustained plant health, vigorous growth, and improved soil vitality for optimal garden and crop performance.

Application Calendar

(best applied during growing season)

SPRING

AUTUMN

AVAILABLE BULK BAGS + BULK

Enhanced Nutrient Availability

Multiple forms of essential nutrients ensure steady, plant-available nutrition with staggered release times to support sustained plant growth and health.

Higher Analysis

Concentrated, nutrient rich pellets contain several forms of major nutrients and trace elements for better yields.

Root & Flower Development

Phosphorus supports strong root systems, flowering, and fruit set while providing energy for critical plant processes and photosynthesis.

Improved Resilience

Calcium, sulphur, and silicon strengthen cell walls, improve nutrient uptake, and increase plants tolerance to pests, disease, and environmental stresses.

Application Rates

Contact your Bailey's Representative for further details.

CROP	RATE
Vines	Pre-plant 100g per m ² . 75g/m of row every 4-6 weeks after flowering.
Flowers & Veg	Pre-plant: 200g/m ² Established 100g/m ² every 4-6 weeks.
Trees & Shrubs	Pre-plant: 50g in the hole, 50g on top Established: 100g/m ² out to drip line.
Fruit Trees	Pre-plant: 100g in the hole, 50g around drip line. Established 500g/tree/year (max 4kg).

Australian Certified Organic

This product is a ACO Certified Organic Allowable Farm & Garden Input, meaning it meets the standards for organic production and can be used without compromising the organic status of the crops grown with it.
