

Blood & Blone

Enriched with potash and trace elements, is an organic plant food nurturing plants while enhancing soil structure and microbial activity. Its gentle, slow-release action caters to all plants, particularly benefiting vegetable seedlings. Whether used independently or alongside higher analysis fertilizers, it ensures comprehensive plant nutrition and soil improvement.

Improves Soil Health & Structure

The organic content promotes soil structure buildup, promotes microbial diversity, enhancing soil health and supporting plant growth.

Boosts Fruit & Vegetables

Enriches fruit and vegetables with essential nutrients, promoting healthy growth and abundant yields.

Natural Slow Release

With its slow-acting formula, it's safe to use in various garden situations, providing lasting benefits without risk of over-fertilisation.

Versatile Applications

Suitable for sandy soil preparation, seedlings, vegetables, and lawn preparation, catering to diverse gardening needs.

Application Rates

Contact your Bailey's Representative for further details.

Pre-Plant and Soil Preparation apply liberally at a rate of 150 grams per square metre. Rake into the top 10cm of soil and water well.

Seedlings & Vegetables use 15-20 grams per square metre every 4 weeks. Increase to every 2-3 weeks when growing vigorously.

Established Plants and Shrubs use 40-50 grams per square metre, applied along the drip line area. Repeat every 4-6 weeks during the growing season.
