

## PRODUCT DESCRIPTION

Baileys Tristar is a fully granulated, phosphate free, low nitrogen, broad spectrum fertiliser. With a lower nitrogen content than most turf fertilisers it maintains steady, vibrant growth, reducing the need for mowing.

## BENEFITS

- Fully granulated for even distribution and maximum nutrient delivery. Reducing the risk of fertiliser burn;
- Spreads easily and disperses after 1-2 irrigation cycles;
- Low nitrogen content reduces rapid growth and the need for frequent mowing;
- Phosphate free for a reducing leaching risk;
- High potassium increases disease resistance and promotes plant resilience in high traffic areas. Also replenishes potassium in light sandy soils;
- High magnesium and iron interacts with nitrogen in the production of chlorophyll to produce great colour and strength;
- Suitable for all seasons. Long lasting in winter and can help avoid additional need for foliar fertilising in cooler months;
- Has a low salt-index - all nutrients are in sulphate form, helping reduce pH;
- Especially effective in high pH soils;
- Suitable for turf and garden: flowering plants, fruiting plants and Australian natives.

Tristar is available in mini prill form for finer turf surfaces. It also comes available with Grosorb soil wetter to help combat hydrophobic soils and aid nutrient and water delivery to plant root systems.

## APPLICATION RATE FOR COMMERCIAL TURFGRASS

	Kgs actual N p/ha	Kgs per 100sq/m	Kgs per/ha
RATE	20kg	2.40kg per 100m <sup>2</sup>	240kg p/ha
	25kg	3.00Kg per 100m <sup>2</sup>	300kg p/ha
	35kg	4.20kg per 100m <sup>2</sup>	420kg p/ha

- Suitable for all commercial turf varieties.
- Kikuyu and Buffalo can be applied at slightly lower rates

## APPLICATION RATE FOR CONTAINERISED PLANTS

Pots Size	Low	Medium	High
130mm	2g	3g	4g
175mm	4g	8g	12g
250mm	14g	28g	42g
300mm	19g	38g	57g

## APPLICATION CALENDAR *(best applied during months coloured dark green)*

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

**SIZES AVAILABLE:** 20kg bags, bulka bags and bulk.

## CAUTION

Nutrient can stain walkways and will need to be washed off prior to irrigation. Keep away from water sources such as ponds, pools etc.
