

Ekote Sport & Green Mini Hi N

27-2-9-2 (2-3 month)

- High Nitrogen for rapid growth out of dormant periods.
- Made in Holland. Patented, state of the art production.
- Mini size 1.8mm granule perfect for low cut tees, greens, tennis courts & profile areas.
- Added Humic Acid boosts nutrient uptake, root growth and soil life.

Ekote Sport & Green Mini Hi N is a specialised, controlled release fertiliser high in nitrogen. The nitrogen is released in a controlled manner over a period of 2-3 months reducing leaching risk and improving nutrient use efficiency. The high nitrogen formulation encourages strong and rapid plant growth out of dormant periods and after renovations by promoting photosynthetic activity and chlorophyll production. Added organic humic acids boosts soil life and stimulates growth and development of the root zone.

Specification

Average granule size	1.8 mm
Longevity at 15°C	3-4 Months
Longevity at 21°C	2-3 Months
Longevity at 30°C	2 Months
Colour:	white/grey/ivory
Coating material:	organic polymer
Coated N of total N:	35%
Coated P of total P:	0%
Coated K of total K:	0%
Packaging 25kg bags	

Analysis

27%	Nitrogen (N) total
0.20%	Nitrogen as ammonia
26.8%	Nitrogen as urea
2.1%	Phosphorus (P) total
1.3%	Water soluble
0.80%	Citrate soluble
9.1%	Potassium (K) total
3.1%	Potassium as sulphate
6.0%	Potassium as Chloride
2%	Sulphur as sulphate

Application Rates

Turf	250kg/Ha
------	----------

APPLICATION RATES ARE A GUIDE ONLY

We recommend soil and plant tissue testing before any application. Rates are dependent on crop, climate, soil and management practices.

Store in unopened original packaging in a dry place protected from frost, heat or direct sunlight. Once opened reseal tightly and keep in a dry place.

Caution: Harmful if swallowed. Do not inhale. Keep out of reach of children. Safety data sheet available upon request.

Please contact your Baileys Area Manager for pricing, product and application advice.
