

PRODUCT DESCRIPTION

Baileys Grosorb is a professional grade soil wetter, tailor made to overcome hydrophobic conditions common to Australian soils. It is suitable for use in commercial nurseries, all turf situations and domestic gardens.

Grosorb enables water to penetrate hydrophobic soils and assists absorption, movement and retention. It promotes plant root development by facilitating an even distribution of water to all areas of the plants container, or when applied to gardens and turf, eliminates 'run off' allowing water to soak through the soil. Grosorb also assists the effective use of fertiliser by channelling nutrients directly into the plant root zone. This product is safe and easy to apply and comes available in both granulated and liquid form for various application needs. Cost effective, it conserves water and reduces the frequency of irrigation treatments.

Various soils types in Australia often suffer a hydrophobic (water repellent) condition, commonly referred to as 'run-off'. This condition occurs naturally, but particularly in soils which are regularly tilled and as gardens and lawns become more established. Similarly garden pots, planters and hanging baskets are affected.

BENEFITS OF LIQUID GROSORB

- ✓ Rapid uptake and quicker correction of anti wetting soils.
- ✓ Can be applied through the irrigation system reducing labour.
- ✓ Can be used in conjunction with a herbicide program.
- ✓ Even coverage.
- ✓ Allows simultaneous applications of fertiliser.
- ✓ Irrigation is not required after application at the recommended rate.

Liquid Grosorb

Treats up to 200m²

APPLICATION RATE

Concentrate 1 Litre

1. Mix 15ml of concentrate (approx. one capful) in 9 litres of water in a watering can.
2. Apply over an area of 3m². This 1 litre container will treat 200m².

Hose On 2 Litre

2. Remove pin from top of spray nozzle.
3. Connect hose to applicator using a click-on hose connector.
6. Apply contents of container over 200m².

APPLICATION CALENDAR

(best applied during months coloured dark green)

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

For best results apply in the months leading up to and within the hot dry periods of summer.

SIZES AVAILABLE: 1lt Concentrate, 2lt Hose On
CAUTION

Nutrient can stain walkways and will need to be washed off prior to irrigation. Keep away from water sources such as ponds, pools etc.
