TURFECT[®] Energy[®] is a breakthrough, biological fertiliser, designed for establishment and maintenance of all turf varieties. This complete, 3-in-1 fertiliser contains a fusion of fast and slow-release nutrients, soil improvers and bio-stimulants, in the one, easy to apply, mini prill.

ADVANTAGE OF BIOLOGICAL FERTILISERS

Turfect[®] Energy[®] is an excellent pre-plant, lawn establishment and maintenance fertiliser. It not only provides premium levels of all turf macro and micro nutrients for a lush, green lawn, it also improves the soils microbiome and capacity to support healthy turf growth.

BIOWISH™ MICROBE TECHNOLOGY

A breakthrough microbial inoculants, Biowish™ contains a proprietary blend of beneficial Bacillus strains designed to operate in a wide range of conditions and be more robust. The induced epigenetic shift in the microbes expresses specific attributes that improve performance across a broad range of environments, specifically acting to:

- Converts nitrogen into the plant-available form and bound phosphorous into available phosphorous.
- Produce a number of enzymes that break down complex organic molecules.
- Strengthen hyphal networks and help roots grow.
- Improves plant vigour by increasing endophytic activity and promoting higher populations of beneficial bacteria in the soil.

Baileys new TURFECT[®] Range of turf fertilisers utilises leading biological technology and WA specific formulations to optimise turf vigour, colour, root development, nutrient uptake and soil health.

Application Rate

Rate / m ²	Frequency
30-50g/m ²	Every 6 to 8 weeks
Refer to label for application instructions. Suitable for all turf varieties. Water well after every application.	

AVAILABLE IN 10KG, 20KG & BULK
