

HORT SPECIAL

14.2%N, 1.5%P, 11.7%K, 14.7%S, 1.0%Mg, 0.4%Mn, 0.3%Fe, 0.1%Zn

PRODUCT DESCRIPTION

Baileys Hort Special is formulated for a variety of crops such as pasture, turf and horticulture. It is similar to N.P.K. Blue with the exception of a slightly lower potassium analysis.

Hort Special can be used as a basal dressing for a wide range of horticultural crops and on turf varieties to increase phosphorus and potassium levels. The formulation strengthens the overall immune system of the plant, improving health and vigor and assisting through hot, dry conditions.

The high nitrogen component encourages good growth levels and crop yield. The phosphorus is utilised for root development in turf-grass after renovation.

High potassium levels improve tolerance to plant stress such as weather extremes, wear and disease. Moisture and nutrients are moved to the growing points of the plant and promote healthy root development. In plants potassium also improves the quality and quantity of floral blooms.

Good levels of magnesium promote winter hardiness and early growth. Magnesium is essential for nitrogen metabolism and chlorophyll synthesis which in turn helps turf-grass to utilise iron and phosphorus.

Hort Special is a balanced formulation, supplying and maintaining the essential nutrients required in a range of crops

BENEFITS

- Fully granulated for ease of handling and uniform distribution of nutrients.
- Ideal for a variety of applications and crops

APPLICATION RATE FOR COMMERCIAL TURFGRASS

	Kgs actual N per Ha	Kgs per 100sqm	Kgs per Ha
RATE	30kg	2.10kg per 100m ²	210kg per ha
	40kg	2.80Kg per 100m ²	280kg per ha
	50kg	3.50kg per 100m ²	350kg per ha

- Suitable for all commercial turf varieties.
- Kikuyu and Buffalo can be applied at slightly lower rates

APPLICATION RATE FOR HORTICULTURE

Application rates vary for horticultural crops dependant on the genus and species of the plant and the form of application. Please contact your Baileys representative for specific information.

APPLICATION CALENDAR

(best applied during months coloured dark green)

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

CAUTION

Nutrient can stain walkways and will need to be washed off prior to irrigation. Keep away from water sources such as ponds, pools etc
