

TURFECT® GREEN

3 IN 1
PRODUCT

A professional colour boosting formulation to produce extended deep green colour on turf, without growth. It provides a readily available source of iron and manganese to rapidly address deficiency and induce chlorophyll production.

WATCH HOW TO

APPLICATION RATES

Rate/m ²	Frequency
3-5ml in 30-50ml of water	3-4 weeks

Or add 100ml to 1L water and apply over 20-30m².

Always shake well before use.

Foliar apply to turf leaf, using high quality hand held or back pack spraying equipment.

AVAILABLE: 1L

FASTER GREEN UP

Contains high levels of iron and manganese, the nutrients that make your lawn really green. No nitrogen means reduced leaf growth and less mowing.

LONG LASTING COLOUR

Corrects deficiencies and delivers quick results. This liquid lawn food is absorbed through the turf leaf instead of the soil so it can be applied throughout the year.

BOOSTS ROOT & SOIL HEALTH

Contains Biowish™ Microbe Technology, a blend of beneficial bacillus microbiology to boost native microbe populations, root growth and nutrient availability.
