SOIL MATTERS GARDEN

COMPLETE SOIL AND PLANT FOOD

- Baileys Soil Matters Garden is an all-in-one biological fertiliser, formulated on the cornerstones of a healthy, highly productive and disease-free soil; Microbes, Minerals, and Humus (that vital organic matter). It provides complete nutrition for the entire garden and acts to regenerate soil fertility.
- The complete mineral balance supplies all essential macro and micro elements for healthy blooms and food.
- The Biological coating contains a proprietary blend of beneficial microbes fermented in a way that makes them operate in a wider range of conditions and be more robust, specifically acting to:
 - Make nitrogen and phosphorus more available to the plant.
 - Improve plant vigour and root growth.
 - Promote higher populations of beneficial bacteria in the soil.
- Contains Humates, Zeolite and Blood & Bone to improve soil structure, boost microbial activity and nutrient uptake.

WHERE TO USE

- Suitable for flowers, roses, fruit, vegetables, trees & shrubs, native plants.
- **Feeding garden beds, pots & established plants:** 30-50 grams/m² every 6-8 weeks in the growing season.
- **Feeding fruit & vegetable:** 25 grams/m² every 4 weeks till harvest.
