

**Sure Green**

For Professional Turf Management

**Helping Australia Grow Towards a Greener Future**

# Sure Green

Baileys **SURE GREEN** range includes a combination of readily available and 10-12 week duration slow release fertilisers individually designed for every stage of professional turf maintenance.

## Sure Green HIGH K

**100% readily available macro and trace elements, ideal for quick response through the growing season.**

The phosphorous and potassium content makes it ideal for use coming out of winter dormancy or at renovation to encourage strong root development.

**Recommended rates 250 - 300kg/Ha**

**12N, 2P, 16.7K + 1.1S, 1.6Ca, 1.2Mg**

## Sure Green GOLD

**50% Readily Available and 50% Slow Release**

Extremely high iron forces excess chlorophyll resulting in a deep dark green appearance. Assists in the uptake of nitrogen, and has a low salt index as it is sulphate of potash based.

**Recommended rates 250 - 300kg/Ha**

**21.4N, 1P, 4.1K + 15.1S, 3Fe**

## Sure Green CASKADE

**25% Readily Available and 75% Slow Release**

Higher slow release component reduces nitrogen loss in summer and produces slower steady growth for longer periods. Higher potassium increases water translocation and reduces summer stress.

**Recommended rates 250 - 300kg/Ha**

**20.5N, 1P, 18.2K + 4.4S**

## Sure Green MAXX

**10% Readily Available and 90% Slow Release**

Premium slow release with an exceptional analysis and high trace elements for deep green colour. The highest slow release of the SURE Range, reducing nitrogen loss in summer and producing slow steady growth over the release period.

**Recommended rates 250 - 300kg/Ha**

**22.9N, 0P, 8.4K + 4.8S, 2.4Mg, 2.4Fe, 0.86Mn**

## Sure Green SPRING HIGH N

**75% Readily Available and 25% Slow Release**

For use after winter dormancy with release qualities to carry through to spring. High nitrogen, aided by calcium and magnesium promotes excellent growth. A more economical option for slow release coming into season.

**Recommended rates 250 - 300kg/Ha**

**19.8N, 0P, 6.9K + 15.1S, 2.1Ca, 1.3Mg**

## Sure Green SUPA K

**65% Readily Available and 35% Slow Release**

Ideal to apply to all turf surfaces on a variety of soil types. Ensures quick response back from wear and summer heat stress. Good levels of trace elements produce excellent colour. Lower slow release allows for a quicker response and steady supply of growth through the coated nitrogen.

**Recommended rates 250 - 300kg/Ha**

**14.9N, 19.9K + 13.3S, 0.81Mg, 0.96Fe, 0.63Mn**

## Sure GreenN PLUS

### 57% Readily Available and 43% Slow Release

80% Sulphate of Potash based with high potassium, high phosphorous and trace elements. Ideal at renovations or as a pre-plant starter as it promotes energy production, new root development and early stages of leaf growth.

Recommended rates 300 - 400kg/Ha

**8.8N, 9.9P, 19K + 7S**

## Sure GreenN SPRING STARTER

### 26% Readily Available and 74% Slow Release

Higher nitrogen than Sure Green Active means there will be a degree of nitrogen release upfront and a much higher release of nitrogen, ideal coming into spring. Steady growth through the season change of AFL to cricket without having to reapply nitrogen.

Recommended rates 250 - 300kg/Ha

**24.5N, 2.2P, 10.7K + 5S**

## Sure GreenN ORGANIC GREENS GRADE

### 62% Readily Available and 38% Slow Release

A **compound granulated blend** that is 15% organic provides two forms of slow release through both natural organics and urea formaldehyde slow release technology. Ideal for renovated areas which require high phosphorous, it also has a complete NPK balance for use on new lawns and as a maintenance fertiliser.

Recommended rates 250 - 300kg/Ha

**17N, 3.5P, 11K + 6.8S, 1.65Ca, 1.8Mg, 0.15Fe, 0.13Mn, 0.06Zn**

## Sure GreenN ALL SEASONS

### 75% Upfront Nitrogen and Readily Available Macros & Trace Element and 25% Slow Release Nitrogen

Well balanced analysis with good levels of nitrogen, phosphorous and potassium plus calcium and magnesium. Ideal renovation fertiliser or fertiliser leading into summer.

Recommended rates 250 - 300kg/Ha

**15N, 2.2P, 12.2K + 13.6S, 1.5Ca, 1.3Mg**

## Sure GreenN ACTIVE

### 21% Readily Available and 79% Slow Release

Good option for maintenance requirements and as a renovation fertiliser. High nitrogen in slow release form is a great fit leading into summer for longer, steady, sustained growth.

Recommended rates 250 - 300kg/Ha

**19.6N, 2.2P, 15K + 4.1S, 1.2Mg, 0.3Fe, 0.16Mn**

## Sure GreenN ORGANIC

### 48% Readily Available and 52% Slow Release

20% Organic through humates, blood & bone and zeolite. Ideal phosphorous levels for all situations. Good level of potassium and a wide array of trace elements to support plant health and development. Contains **silicates**, added **humates** and is a **compound granulated blend**.

Recommended rates 250 - 300kg/Ha

**14.6N, 5.0P, 10.4K + 5.3S, 2.3Ca, 1.0Mg, 0.11Fe, 0.13Mn**

## Sure GreenN SPRING N AUTUMN

### 100% readily available macro and trace elements ideal for quick release through all seasons.

Well balanced analysis with good levels of nitrogen, phosphorous and potassium plus calcium and magnesium make this a perfect renovation fertiliser. Contains higher levels of trace elements than Sure Green All Seasons to produce exceptional colour.

Recommended rates 250 - 300kg/Ha

**15.7N, 2.9P, 9.7K + 15S, 1.5Fe, 0.95Mn, 0.97Mg**

### APPLICATION RATES - GUIDE ONLY

We recommend soil and plant tissue testing before any application.

Rates are dependent on crop, climate, soil and management practices.

Contact your Baileys Area Manager for your individual requirements.
