Product Information SHEET Potassium Sulphate

Horticultural Grade (HG)

Product Characteristics

- White, free flowing crystals
- Low in sodium and chloride
- Recommended when high rates of potassium are required in combination with sulphate
 e.g. during periods of fruit ripening
- Ideal for fertigation, foliar application and as raw material for water soluble NPK's
- Compatible with most water soluble fertilisers, except those containing calcium

Packaging

Available in 25kg bags and 1250kg Bulka Bags

Dosing Instructions | Fertigation

Crop	Application Timing	Application rate in kg/ha/year
- Deciduous fruit trees (bearing)	Start after fruit-set, continue throughout the irrigation	150 - 350
- Citrus trees (bearing)	season until 3 - 4 weeks prior to harvest	200 - 400
Vineyard (bearing table grapes)	From initiation of spring bud opening, continue throughout the irrigation season until 3 - 4 weeks prior to harvest	100 - 250
Banana and plantation	At plantation establishment, throughout the irrigation season	300 - 500
Pistachio	Throughout vegetative growth season, approximately 1/3 of annual rate during fruit development	170 - 300
Vegetables (fruit bearing)	From early vegetative growth until 3 - 4 weeks prior to harvest	100 - 300
Processing potatoes	From tuber initiation until mid-tuber bulking	100 - 200
Processing tomatoes	Start at 4 weeks until fruit maturation	150 - 300
Asparagus	Throughout the growing season	190 - 330

Product Information SHEET Potassium Sulphate (HG)

Dosing Instructions | Foliar

Crop	Application timing	Application rate in kg/ha/application	Application rate in % w/v
- Deciduous fruit trees	3 - 5 applications: Starting after fruit-set at 14 - 21 days intervals	7 - 10	2.8 - 3.5
- Olive trees/citrus		9 - 12	3.0 - 4.0
- Table grapes (adult)		7 - 10	2.0 - 3.0
Fruit vegetables	1 - 3 applications: At approximate 2 week intervals, during vegetative growth and after flowering	5 - 8	1.0 - 1.5
Leaf vegetables	3 applications: From 4 weeks after transplanting at 10 - 15 day intervals during vegetative growth	5 - 8	1.0 - 1.2
Potato, sweet potato	3 applications: From 3 weeks after transplanting, at approximate 10 - 15 days intervals	4 - 6	2.5 - 3.2
- Carrot, bulb onion	3 applications: From 4 weeks after germination, at	3 - 5	2.0 - 3.0
- Rape, turnip	approximate 10 - 15 day intervals	5 - 8	2.5 - 3.5
Sugar beet	2 - 3 applications: During root bulking	5 - 8	3.0 - 5.0
Oil-seed rape	1 - 2 applications: During vegetative growth until flowering	3 - 6	1.0 - 1.5

When preparing a stock solution of Potassium Sulphate, do not mix with fertilisers containing calcium.

Application rates and dosages listed in this brochure are a guide only. They are subject to soil and climatic conditions, influence of previous crops and other factors. For exact application rates and dosages contact your Baileys Area Manager for a soil, plant and or water analysis.
