

Energy Chicken Pro

A fully composted, pelletised poultry manure that provides enhanced nutrition for healthier soils and vibrant plants. This product is a ACO Certified Organic Allowable Farm & Garden Input. With high organic carbon and multi-form nutrients that release gradually, this product boosts water retention, microbial activity, and plant growth for thriving, productive gardens and crops.

Application Calendar

(best applied during growing season)

SPRING

AUTUMN

AVAILABLE BULK BAGS + BULK

Fully Composted

Avoid the issues associated with raw manure such as leaching, pest and disease. Provides stable, plant available nitrogen.

Higher Analysis

Concentrated, nutrient rich pellets contain several forms of major nutrients and trace elements for better yields.

Rich in Organic Carbon

High in humic acid to improve water and nutrient holding capacity of soils and boost microbial activity.

Humic Acid Retention

Our manure is composted under cover to preserve valuable humic acid, a powerful bio-stimulant that boosts both soil and plant health.

Application Rates

Contact your Bailey's Representative for further details.

CROP	RATE
Home Garden	150g - 300g per m ²
Veg & Vine Fruit	500 - 2500kg/Ha as pre-plant
Tree Crops	250 - 500kg/Ha or 500g/tree/year (up to 4kg)
Broadacre Crops	75kg - 150kg/Ha
Turf & Pasture	200kg - 1000kg/Ha

Benefits of Pellets vs Raw Manure

- Manure pellets provide higher nutrient density with screened-out sawdust, delivering more concentrated N-P-K levels.
- They offer controlled nutrient release, preventing nutrient wash-off and ammonia burn.
- Easier to apply, pellets reduce the need for costly spreading equipment.
- Fully composted eliminates harmful bacteria like e-coli and salmonella.
