

# TURFECT<sup>®</sup> BOOST

**41**  
IN  
PRODUCT

A highly concentrated humic acid soil conditioner and biological inoculant to enhance soil fertility and capacity to support healthy turf growth. Effective on all soil types, particularly sandy soils, improving water and nutrient holding capacity.

WATCH HOW TO

## APPLICATION RATES

Rate/m <sup>2</sup>	Frequency
3-5ml in 30-50ml of water	2-4 weeks

Or add 100ml to 1L water and apply over 20-30m<sup>2</sup>.

Always shake well before use.

Foliar apply to turf leaf, using high quality hand held or back pack spraying equipment.

**AVAILABLE: 1L**

### IMPROVES MOISTURE RETENTION

Effective on depleted or sandy soils to improve water and nutrient holding capacity, promotes turf recovery and resilience in stressful conditions.

### ENHANCES ROOT DEVELOPMENT

By stimulating and feeding beneficial biology.

### IMPROVES NUTRIENT UPTAKE

High cation exchange capacity improves fertiliser retention and uptake.

### ACTIVATES & FEEDS BENEFICIAL BIOLOGY

Contains BiOWiSH a blend of beneficial bacillus to boost root and soil health.
